Adam Davies

adavies4@illinois.edu
+1 (801) 357-9217
https://ahdavies6.github.io/

PhD candidate at UIUC (University of Illinois Urbana-Champaign), advised by Profs. ChengXiang Zhai and Julia Hockenmaier.

Research areas: *natural language processing (NLP), (mechanistic) interpretability, distribution-shift robustness, causal machine learning,* and *multimodal representation learning.*

EDUCATION

University of Illinois Urbana-Champaign, Urbana, IL — 08/2021 - Present
Ph.D. in Computer Science (anticipated graduation May 2027)

University of Utah, Salt Lake City, Utah — 08/2016 - 05/2021
B.S. in Computer Science (May 2021, cum laude)
B.S. in Cognitive Science (May 2021, cum laude)

RESEARCH EXPERIENCE

Doctoral Researcher at INVITE — 05/2024 - Present

- Currently researching the relationship between mechanistic interpretability, distribution-shift robustness, and fairness/bias of LLMs.
- Studied LLM steering for distribution-shift robustness and bias mitigation [6, preprint], LLM-based learner agent simulation for educational AI [8, **AAAI-25** (conference poster)], and the principles of socially responsible foundation models [4, preprint] for educational LLM applications [7, **Frontiers AI** (journal)].

Doctoral Researcher at UIUC — 08/2022 - 05/2024

- Studied foundational mechanistic interpretability, including...
  - defining and evaluating the reliability of leading causal probing methods [1, **IAI@NeurIPS24** (workshop oral)].
  - introducing a general causal probing framework for LLM interpretation and analysis and new causal probing methods based on adversarial machine learning [3, **IAI@NeurIPS24** (workshop poster)].
  - surveying the history of interpretability and its parallels with cognitive science [2, preprint].

- Evaluated the abstract shape recognition abilities of vision-language models by synthesizing benchmarks using conditional generative models [5, **NeurIPS24** (conference poster)], and studied how synthetic data from text-to-image models can improve distribution-shift robustness of image classifiers [10, **ICML24** (conference poster)].

Doctoral Researcher at NCSA 08/2021 - 08/2022

- Researched intersection of NLP, data mining, and computational social science for studying social construction using "big data" historical newspaper collections [11, **JCSS** (journal)] and [9, **PASC** (conference oral)].

TECHNICAL SKILLS

- **Deep Learning in Python:** PyTorch, TensorFlow, Keras, 🤗 Transformers
- **Data Science & Machine Learning in Python:** NumPy, SciPy, scikit-learn, Pandas, 🤗 Datasets
- **Classic NLP in Python:** spaCy, NLTK, CoreNLP, WordNet, gensim
- **Scientific Visualization in Python:** Matplotlib, Seaborn, Plotly, Jupyter
- **Collaboration and Publishing:** Git, LaTeX, Overleaf, and Markdown.

TALKS

- **Measuring the Reliability of Causal Probing Methods** 12/2024
  (Oral, NeurIPS24 Workshop on Interpretable AI)

- **Cognitive Interpretability in the Era of LLMs** 10/2024
  (Guest Lecture, UIUC Seminar in Psychology)
- **Causal Probing for Language Model Interpretability and Analysis** 09/2023
  (Tutorial, University of Oxford)
- **Computational Social Science with Historical Text Analysis** 06/2022
  (Oral, Platform for Advanced Scientific Computing Conference)

TEACHING AND MENTORSHIP

Research Supervision and Mentoring

Advised the following undergraduate students:

- Chirag Rastogi (UIUC BS) 07/2023 - 10/2024
  - Publication [1] (topic: *evaluating interpretability methods*)
- Jize Jiang (UIUC BS → MS) 01/2023 - 05/2023
  - Undergraduate thesis (topic: *formal reasoning with LLMs*)
  - First publication [3] (topic: *language model interpretability*)

Co-advised the following undergraduate students:

- Arshia Hemmat (Oxford internship) 01/2024 - 08/2024
  - First conference publication [5] (topic: *evaluating abstract shape recognition*)
- Jianhao Yuan (Oxford BS → PhD) 10/2022 - 05/2023
  - Undergraduate thesis [10] (topic: *synthetic data for distribution-shift robustness*)

Teaching Assistant at UIUC 08/2023 - 05/2024

- *Applied Machine Learning* (Spring 2024)
- *Natural Language Processing* (Fall 2023)
